

Installation Guide/User manual for StudyCat
Developed by: SmittenKittens

Installation Instructions:

If StudyCat was on the app store:

1. Check that your phone can handle 60 MB of memory (size of StudyCat).
2. Go to App Store on any version of the Iphone, not available Android.
3. Download app onto Iphone device.
4. Run StudyCat and enjoy!

If StudyCat is not on the app store:

1. Request your certificate: Launch Xcode 10 and go to your preferences menu. Then go to the “Accounts” tab. Fill in your Apple iOS developer account details here. Click the “+” icon below the certificates pane, you can request a new iOS Development Certificate and do the same thing and request an iOS Distribution Certificate too.
2. Deploy the app to the device (does not work without USB connection)

User Manual:

1. After downloading the app and opening it, the user is greeted with the main page.
2. Once the begin button is pressed the user will go to the main view which displays an empty room with wooden flooring and a cat tree with a window in the corner.
3. In the top right is a drop down menu which has 6 buttons (Home, Music, Timer, Calendar, Goodie Bag and To-Do List). The user may navigate to any of the different views
4. If the user navigates to the Music tab they will be able to see the connect to spotify button which in the future will allow them to listen to music through the app while studying by connecting their spotify accounts
5. If the user clicks the Timer button they will go to a screen with multiple timer buttons The times can be clicked and the timer started to begin a study session. If the user clicks the break button they will have a two minute break before the timer restarts. If the user clicks the stop button the timer will be reset back to zero. As the user studies during the timer cats will appear at certain times, rewarding the user.
6. If the user presses the Calendar button they will go to a page which shows a calendar with the current month. The current and future dates are in a brighter font, while previous days are in a darker font. The user can press the forward

arrow to navigate to future months and press the back arrow to navigate to previous months (only up until the current month). The user may also press to highlight dates.

7. If the user presses the Goodie Bag button they will be taken to a page which displays a couple accessories which can be added to cats to customize them, but currently it is in the process of being developed.
8. The final button leads to the To-Do List which has a list that the user can type into. The user will be able to add in what they currently have to do and remove tasks as they complete them.
